Ideas

Jess:

Ospreys nest fell down during windstorm at ball field light and they are rebuilding it. They have nest platforms that can be installed. Not sure something for us or not? Maybe a grant for them thru CMP I heard.

- Mr. Brooks tech teacher at middle school extra credit for kid to do a video presentation of the school forest?
- Worth our while to speak with Vocational center in Augusta for work on cabin? They have plan design, electrical and carpentry?

Beth:

- Cutting Lower holes in bird fence for kindergarten students.
- Fixing rotten boards in bridge
- Wiring out building
- Fire extinguisher mounted
- S.O.P. for arrival and leaving
- Handle is needed on the inside of the door
- Talk to town about letting school have key

Elaine:

Plack at Red Pine Plantation

Clean up around Measurement Station

Repair fence at Bird Watching Station

Other needs/ideas
