

## KVCOG Regional Partnerships

### PFAS Emergency Relief

Maine Farmland Trust and the **Maine Organic Farmers and Gardeners Association (MOFGA)** are launching a new **PFAS Emergency Relief Fund** to support farmers impacted by potential PFAS contamination.

The fund is designed to help pay for initial PFAS testing on farms that choose to do their own testing, and to provide short-term income replacement for farms that the Maine Department of Agriculture, Conservation and Forestry (DACF) has identified as having high test results. This fund will serve as a safety net, providing interim support from initial PFAS testing until they can access Maine DACF's longer-term support programs.

***Any Maine farmer dealing with PFAS contamination is eligible to enroll, regardless of whether or not a farm has worked directly with either of the organizations.***

If you'd like to learn more and support the fund, you can donate here: <https://www.mofga.org/support-the-pfas-emergency-fund/>  
Feel free to reach out if you have any questions. Thanks!
